Discussion

Conclusion

References

- Capture the audience's attention, since this is all you need [1].
- Citations are supported as seen in the line above.
- Briefly explain why this topic matters.
- State the real-world problem or use case.
- Optionally mention who might benefit from your results.

Key Findings

Comparison Table

Discussion

Conclusion

References

Concept A

- Short definition.
- Why it is important.

Concept B

- Short definition.
- Relation to Concept A.

Example TikZ Diagram

Introduction

Motivation

Key Findings

Comparison Table

Discussion

Conclusion

References

```
1  def fibonacci(n):
2      """Calculate the nth Fibonacci number."""
3      if n <= 1:
4          return n
5      else:
6          return fibonacci(n-1) + fibonacci(n-2)
7
8      # Example usage
9      result = fibonacci(10)
10     print(f"The 10th Fibonacci number is {result}")
```

Replace with your own code. Supports many languages: Python, Java, C++, etc.

Block Environments

Introduction

Motivation

Discussion

Conclusion

References

Standard Block

Use blocks to highlight important information or definitions.

Alert Block

Use alert blocks for warnings, cautions, or critical points.

Example Block

Use example blocks to show concrete examples or use cases.

These colored blocks help organize and emphasize content.

Method Overview

Discussion

Conclusion

References

- 1 **Data / Setting:** Describe the dataset or experimental setup.
- 2 **Model / Algorithm:** Summarize what you apply.
- 3 **Metrics:** Specify how you evaluate performance.

Example PGFPlots Chart

Method	Accuracy	Time (s)	Memory (MB)
Baseline	85.3%	12.5	256
Method A	89.7%	10.2	312
Method B	92.1%	15.8	289
Ours	94.5%	9.8	278

Table: Quantitative comparison of different methods.

Our method achieves the best accuracy with competitive speed and memory usage.

Discussion

Introduction
