Paper Title With A Long First Line Second Line Of The Paper Title

Author One (Institution) & Author Two (Institution)

Presentation Date
Conference Name | City, Country

1

Section Title

1 Main Takeaway Goes Here

Optional subtitle, if useful

Use this slide as the basic text-and-bullets layout.

- First message, written as a complete but short thought.
- Second message, ideally tied to an equation, figure, or table.
- Third message, with only the detail needed for the live talk.

1 Equation Slide

Keep the math native to LaTeX

Inline math stays clean: $c_t + a_{t+1} = y_t + (1 + r_t)a_t$.

$$V_j(a, z, s) = \max_{c,a',\ell,k} \left\{ u(c, \ell) + \beta \mathbb{E} \left[V_{j+1}(a', z', s') \right] \right\},$$
$$c + a' = (1 + r)a + wzh(\ell, k) - T(y, k) + B(s, k).$$

1 Full-Width Block

Block Title

Use this component for a definition, assumption, mechanism, or one compact result that deserves visual separation from the surrounding argument.

- The block spans the full text width and respects the 1.6 cm slide grid.
- The header uses the deck blue; the body stays quiet and readable.

$$y_i = \alpha + \beta x_i + \varepsilon_i.$$
