Presentation Sample (title)

To inspire you (subtitle)

You can add your name/function here

University of Antwerp

Sample ‘title and text’

Text slide: 1st level has no bullet points. This is normal text on a beamer frame.

- 2nd level is same as first, but with bullets. More lines have the same indent. This is the first itemize level.
- Nest ‘itemize environments’ for getting the indent you wish.
  - 3th level gets extra indent and smaller font size.
    - The same for 4th level. You really should not go deeper.
- Use the theme colors to highlight text.

This is the bulleted slide. Keep the title short

You can add a subtitle if you want.

- This is the bulleted level 1
  - and the second
    - and third

This is the numbered slide. Keep the title short

You can add a subtitle if you want.

1. This is numbered level one
    1. and the second
        1. and third

And one with a title only

You can use this one for imagery, tables, etc...

Secret: Actually it doesn't matter. You add to a frame whatever you like in LaTeX

And this is a coloured divider. Use it as an introduction for a chapter. Or a quote. Or anything that will add value to your presentation

Chapter 1

This is a section title with ‘sectiondivider’ option

colours

These are the defined corporate colours and their names
