simple

A beamer theme

`simple` is a minimalist Beamer theme that features

- a watermark logo in the background
- slide numbers
- *emph*asized and alerted text

And of course...

blocks, columns, and all Beamer power

watermark

not only for images

- You can place *any* LaTeX contents as a watermark

In preamble

```
\setwatermark{\includegraphics[height=8cm]{%
                img/Heckert_GNU_white.png}}
```

Just before this frame

```
\setwatermark{\fontsize{125pt}{125pt}%
                \selectfont{Simple}}
```

Options

Fine adjustement of the watermark position

- `hoffset`
- `voffset`

They admit any *positive* or *negative* spacing unit
Note that some warnings about *badboxes* might be generated at compilation
