

DR. WAFFLE BYTEWHISTLE

waffle.bytewhistle@example.com ◇ (+1) 555-123-COOKIE ◇ Pancake Harbor, Moonland

SUMMARY

Software Engineer specializing in building whimsical digital contraptions and taming rebellious code goblins. Designed a **98%+ accurate snack-detection oracle** used by **75+ kitchen robots** to distinguish cookies from suspiciously cookie-shaped rocks. Created a **mobile wizard portal** used by **1,000+ imaginary villagers** to complete quests and submit requests.

SKILLS

Code Sorcery	Python Potions, JavaScript Juggling, TypeScript Tricks, API Alchemy
AI Mischief Management	ML Magic, Prompt Puppetry, Model Whispering, Data Divination
Engineering Gadgets	Database Gardening, Cloud Cloudlets, Bug Hunting, Spreadsheet Sorcery

EXPERIENCE

- Automation Wizard Apprentice**, Bureau of Tiny Miracles, Pixel Grove **Sep 2023 - Dec 2025**
- Automated repetitive tasks so employees could spend more time solving important problems and fewer time arguing with spreadsheets.
 - Created reliable data pipelines that carried information safely across the kingdom without losing important socks.
 - Added monitoring charms that alerted teams before small problems evolved into legendary disasters.
- Software Spell Engineer**, The Department of Suspicious Buttons, Cookie Cove **Jul 2022 - Aug 2023**
- Developed reusable software spells that prevented common bugs from escaping into the wild.
 - Improved error handling so crashed applications could explain themselves instead of dramatically fainting.
 - Maintained magical documentation scrolls that helped future engineers avoid ancient coding curses.
- Senior Bug Wrangler**, The Department of Suspicious Buttons, Cookie Cove **Jan 2021 - Jun 2022**
- Built backend machinery that transformed confusing button presses into predictable and delightful outcomes.
 - Designed automated workflows that politely escorted tasks from “where did this come from?” to “everything is handled.”
 - Created internal tools that reduced paperwork dragons and improved team productivity across the department.

PROJECTS

- Explain-O-Matic 3000** — [Project Link](#) **Feb 2024 - Nov 2024**
- Built a friendly explanation machine that translated mysterious computer guesses into understandable stories.
 - Designed evaluation tools to measure when the machine was clever versus confidently confused.
 - Improved response speed so explanations arrived before users could finish saying “why though?”
- QuestFlow (The Task Dragon)** — Dragon Training, Chaos Control, Quest Routing **Jun 2023 - Oct 2023**
- Created an automation dragon that moved requests between departments without losing important details.
 - Built activity logs that recorded every dragon adventure for future historians.
 - Added safety checks preventing the dragon from accidentally organizing chaos.

EDUCATION

- Master of Digital Wizardry**, University of Tiny Computers, Pixel Plains **Sep 2019 - Jun 2021**
- **CourseWork** — *Spell Algorithms, Quantum Debugging, AI Familiars, Rune Engineering, Wand Programming*
- Bachelor of Button Engineering**, Academy of Mechanical Giggles, Whistlewood **Sep 2015 - Jun 2019**

CERTIFICATIONS

- Certified Spreadsheet Dragon Slayer** — *Guild of Office Wizards* **Mar 2025**
- Advanced Bug Whispering** — *Institute of Questionable Software* **Oct 2024**
