EDUCATION

Beiyang Technological University **Aug. 2024 – Jul. 2026**
PhD in Trash Generation (Academic Trash in AI) *Fine S∞ Country*

Xijing University of Snail Mail and Dial-Ups **Sep. 2020 – Jun. 2024**
BEng in Daydreaming (AI Hallucinations) *Fine Less Country*

PROFESSIONAL EXPERIENCE

Meimeituan **May. 2024 – Aug. 2024**
Deliver Guy *Worldwide*

- Pioneered a cutting-edge route optimization algorithm by always choosing the street with fewer barking dogs.
- Maintained a 99.99% success rate in balancing bubble tea cups on one hand while navigating traffic on an electric scooter.
- Successfully deployed "predictive AI" by guessing customer complaints before they were even made.
- Conducted real-time A/B testing on delivery speeds: faster delivery yielded more smiles but fewer tips.

State Key Lab of Blabla and Buzzwords **Mar 2023 – Apr 2024**
Research Assistant *Mental Space*

- Published a groundbreaking paper in *Journal of Things Nobody Reads*, where I boldly solved a problem no one knew existed, making a monumental impact on precisely three researchers worldwide.
- Proposed a revolutionary framework for blabla generation, combining AI with wishful thinking, which increased task accuracy by 30% and baffled the lab's printer by 100%.

PUBLICATION

- **S. Zhang**, S. Li, W. Wang, L. Zhao, "State-of-the-art Large Language Model for Generating Buzzwords," *Journal of Things Nobody Reads*, 2024.

RESEARCH PROJECTS

AI Powered Cryptocurrency Prediction, NOMoney Hackathon **Sep 2024 – Oct 2024**
2nd Place in Losing Money via Quant Trading Track

- Dreamt up a project concept so ambitious that even the judges needed an espresso to follow it. Rallied a team of 5 sleep-deprived souls, split tasks like pizzas, and somehow secured 2nd place in a adrenaline-fueled coding frenzy.
- Convinced a pre-trained LLaMA model to perform zero-shot sentiment analysis on Web3 chaos, achieving 83% accuracy by teaching it to read between the lines of overly optimistic crypto tweets and apocalyptic Reddit threads.

Reward Model for Large Language Models, Xaggle Competition **Jun 2024 – Aug 2024**
Silver Medal

- Wrangled GPUs like a rodeo cowboy, setting up distributed multi-GPU training with ZeRO-2 and DDP, while fine-tuning base models and stacking them like a sandwich to crush the leaderboard.
- Tamed data imbalances between GPT and LLaMA datasets using oversampling, augmentation, and sheer willpower, while making fancy visualizations in Seaborn that even made Matplotlib jealous.

AWARDS

- **Ctrl+C Ctrl+V Excellence (2024):** For groundbreaking research in creative plagiarism.
- **GPU Whisperer (2023):** Successfully convinced GPUs to not crash for an entire week.
- **Deadline Acrobat (2022):** Delivered results so last-minute even the clock was sweating.
- **Bug Whisperer (2021):** Solved bugs nobody else could find—because I caused them.

SKILLS

- **Programming:** Bug Summoning, Code Whispering
- **AI/ML:** Model Tamer, Data Diviner
- **Cloud Computing:** Cloud Wanderer, AWS Navigator (Lost)
- **Data Science:** Dataset Destroyer, Chart Fabricator
- **Team Management:** Herding Cats, Deadline Dodging
- **Soft Skills:** Coffee-Fueled Communication, PowerPoint Sorcery
