

University of Pittsburgh

Pitt Beamer Template

This is an optional subtitle

Zac Yu (zac.yu@pitt.edu)

October 4, 2026

Slide title

Slide subtitle (optional)

This is a sample page that showcases some styles of the theme.

- Some bullets
  - Some sub bullet
  - Another sub bullet
- And another buller

1. Some numbering
   1.1 Some sub numbering
   1.2 Another sub numbering
2. And another numbering

We can use blocks

A general block

Blocks can have any type of text including math $e^{i\pi} - 1 = 0$.

Theorem

And this is a theorem.

Proof.

And this is a proof. Note that the previously theorem is now perfectly proven to be true in all cases. □

Definition

This is a definition of a new concept.

Columns should work perfectly too

First column text here
And overlays should work well also.

Second column here[a].

[a] Footnotes are also supported!

Columns should work perfectly too

First column text here
With text appearing and disappearing!

Second column here[a].

[a] Footnotes are also supported!

About This Template

This unofficial Pitt beamer template is based on the (unofficial) CMU beamer theme created by Paulo Casanova and released freely on his website (`http://www.cs.cmu.edu/~pcasanov/`).

The title page design is inspired by that of lecture slides released by Dr. Nicholas Farnan (`nlf4@pitt.edu`).
