How to Use the IACR Journal Class

A Template

Joppe W. Bos[a,1] and Kevin S. McCurley[2]

[1] NXP Semiconductors, Leuven, Belgium
[2] Self, San Jose, USA

Abstract

The abstract goes here. You may use mathematics and macros in your abstract, but do not use `\cite` or footnotes. The abstract should be self-contained. When you create your `final` version, you will also need to supply a text-only abstract in the `textabstract` environment.

Keywords: Dirac δ function, unit impulse

1 Introduction

This is the template showing how to use the IACR Journal LaTeX class `iacrj.cls`. See the "How to Use the IACR Journal Class" document (`iacrj-doc.pdf`)for more details.

2 Bibliography

Citing papers is done in the usual way using BibTeX or `biblatex` commands. For example: the RSA paper [RSA78].

It is highly encouraged to use CryptoBib from https://cryptobib.di.ens.fr
