Motivation

This is a subtitle

You should place the `beamerthemepure.tex` with your main file together. Then add

`\usetheme{pure}`

in your preamble.

theorem environments

Theorem (a theorem)

A theorem here.

Definition (a definition)

A definition here.

a proof.

A proof here. □

blocks enviroments

Including blocks, alert, examples

block title

A block here.

alert title

An alert here.

Examples (example)

An example here.

different lists

1. item1
2. item2
3. item3

- item1
- item2
- item3

different lists

1. item1
2. item2
3. item3

- item1
- item2
- item3

item1 This is item1.

item2 This is item2.

Equations

$$4\pi w^{\infty}\left(-d,z\right)=u^{sc}\left(z,d\right),\ z\in\mathbb{R}^{3}\backslash\overline{D},\ d\in\mathbb{S}^{2} \tag{1}$$

- By the equation (1), we have that ... .
- For details, we refer to Google!

Misc

- You can use `alert` to emph something important.

Misc

- You can use `alert` to emph something important.
- You can use `columns` to arrange your slides.

Misc

- You can use `alert` to emph something important.
- You can use `columns` to arrange your slides.
- Maybe use different colors: **purple** for emph; teal for references.

Misc

- You can use `alert` to emph something important.
- You can use `columns` to arrange your slides.
- Maybe use different colors: **purple** for emph; teal for references.
- You can use `columns` to arrange your slides.

Misc

- You can use `alert` to emph something important.
- You can use `columns` to arrange your slides.
- Maybe use different colors: **purple** for emph; teal for references.
- You can use `columns` to arrange your slides.
- ...

Conclusions

Enjoy LaTeX and Beamer!
