1 Introduction

This template is intended for articles published in the Digital Humanities in the Benelux Journal.[1] Use this to submit the final version of your manuscript to the journal. The template will ensure your article adheres to the style guidelines of the journal.

2 Instructions for preparing your manuscript

If you are unfamiliar with LaTeX, there are many online resources with documentation and tutorials on how to use LaTeX.[2] There are specific instructions for preparing your article for the DH Benelux Journal.[3].

3 Working with bibtex references

The DH Benelux Journal uses bibtex for references and citations. You can cite other work using bibtex keys Maxwell (2013). Your article should end with a section called 'References' that includes a link to your bibtex file that contains the bibliographic information of the work you cite (see below). Upon generating the print version with a LaTeX engine, references to the cited works are included.

4 Adding figures and tables

This section has two sub-sections.

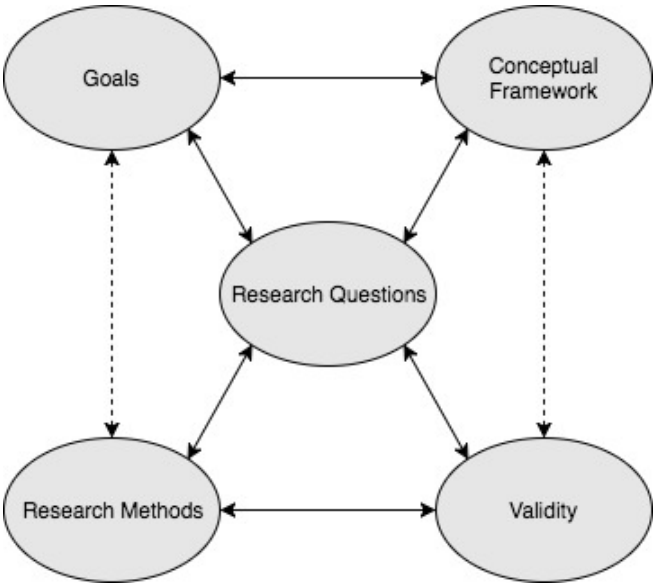

Figure 1: This is where the caption of the figure goes. Remember, figure captions go below the figure.

Table 1: Table caption. Captions for tables go above the table, unlike for figures.

This	is the	header row
1	2	this is a cell in the first row
3	4	this is a cell in the second row

4.1 Adding figures

If you include figures or tables, use reference keys (e.g. Figure 1), to create an unambiguous reference from the text to each figure and table, e.g. to Table 1.

4.2 Adding tables
